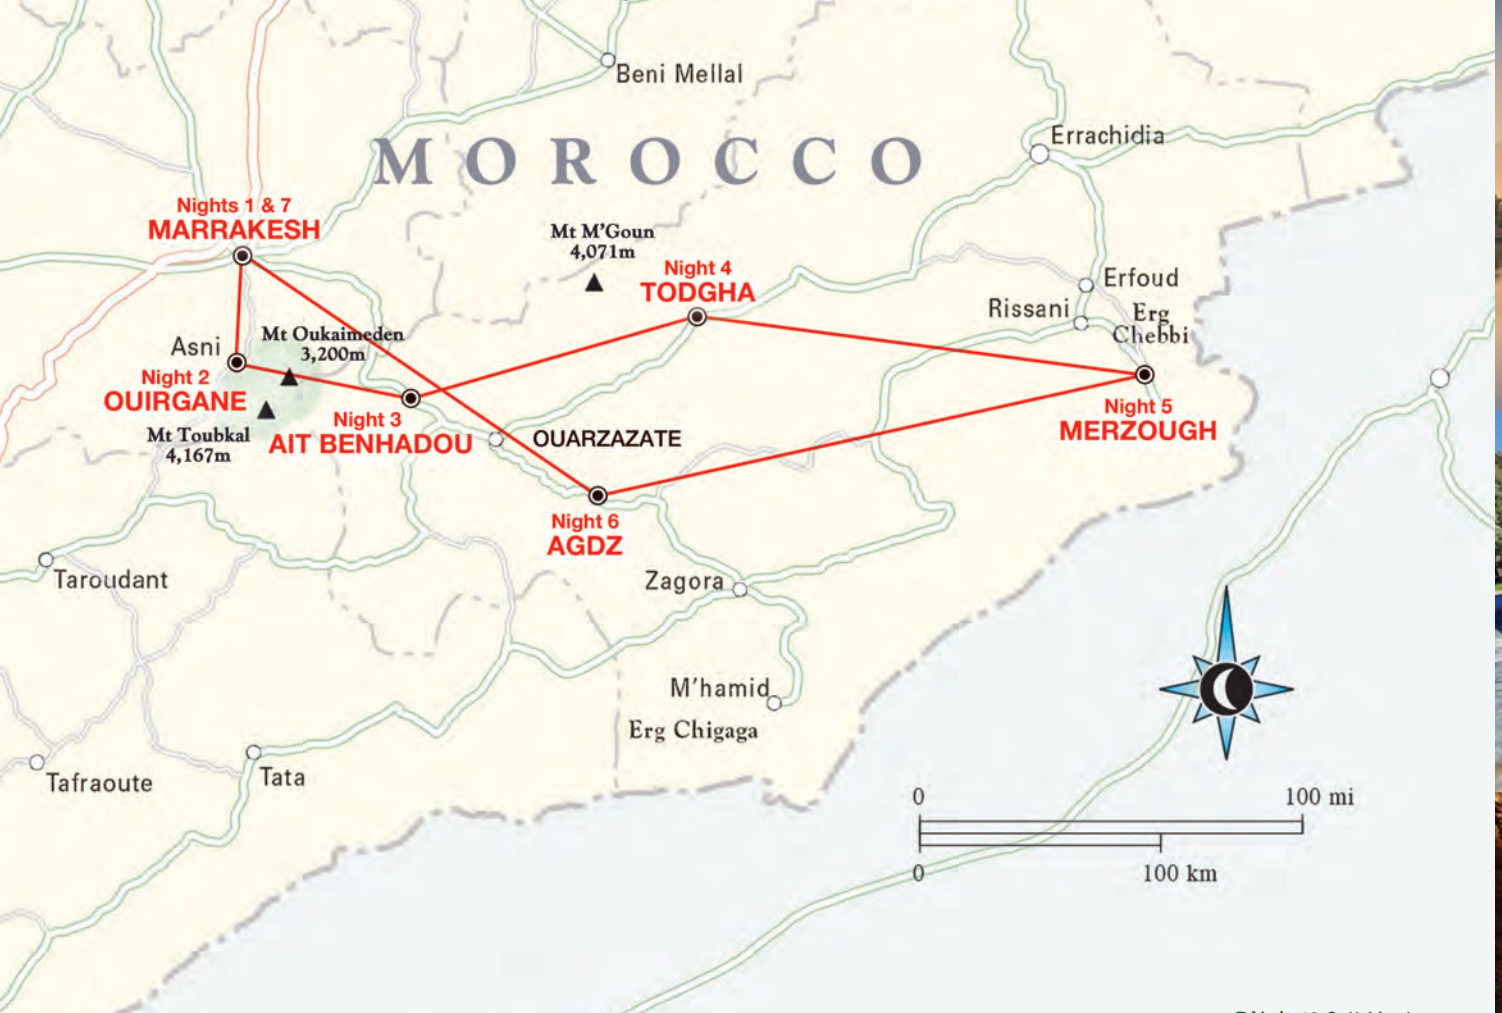
Ride MOROCCO 2022

A unique fundraising experience

Riding in challenging North Africa to provide a flavour of the area in which our charity supports children's education

part of The Ride East Africa Series



Formed in 2017, Charity (Adventure) Links exists to help smaller charities raise funds and collect money by our own efforts.

How do we do this? Through bespoke cycling and other challenges, primarily in East Africa, raising funds to support small charities working in education and vocational training. We partner with experienced and professional operators both in the UK and East Africa who handle all the logistics including language, guides, routes, accommodation, food, mechanics and backup.

The disruptions of COVID have caused RIDE UGANDA to be delayed until 2023. We are delighted however to launch RIDE MOROCCO 2022 which will see a mixed party of all ages tackle the beautiful Atlas Mountains.

As always we will be supporting UK registered charities running children's educational projects in East Africa. The income generated by our riders is supplemented by several generous commercial sponsors.
